

## INFORMED CHEMICAL PEEL CONSENT

1. I authorize the chemical peel listed above, to my face and / or neck, chest and hands.
2. Depending on the chemical peel site, there may be redness and/or irritation and discoloration (dark tan and pink marks) that can persist for several days or weeks.
3. Occasionally hyper pigmentation or hypo pigmentation might develop after the peel that might persist for weeks or months.
4. With each chemical peel results are achieved. Nevertheless, no guarantees can be made as to the final results. Any number of chemical peels may be required to achieve desired results, depending on the present skin condition, skin care maintenance program, age and lifestyle of the patient.
5. Once the desired results are achieved, I understand that maintenance peels are necessary to sustain the rejuvenative results. The frequency depends on the individual's own genetics, age and lifestyle.
6. Once peeling process is complete it is essential to follow instructions and/or use the recommended skin care line, or other, to maintain results and avoid any future complications especially hyper pigmentation.
7. I understand that this peel is made of the strongest acids such as Phenol and Trichloroacetic acid, also referred to as TCA, salicylic acid, among others. The exact composition is proprietary information of the Peel system, and I waive any rights, present or future, I may have as to request to divulge the exact composition or concentrations.
8. Our services are cosmetic in nature, and are non refundable. I understand that payment is my sole responsibility.
9. This office is regulated by the rules of the Board of Medicine as set forth in Rule Chapter 64B8, F.C.A.

I agree that this constitutes full disclosure, and that it supersedes any previous verbal or written disclosures. I certify that I have read and fully understand the above paragraphs and that I have had sufficient opportunity for discussion and to ask questions.

## AFTER CARE FORM

1. Immediately after the treatments, there should be redness and bumps at the treatment area, which may last up to 2 hours or longer. It is normal for the treated area to feel like sunburn for a few hours. You should use a cold compress if needed. If any crusting, apply antibiotic cream. Some physicians recommend aloe vera gel or some other after sunburn treatment such as Desitin. Darker pigmented people may have more discomfort than lighter skin people and may require the aloe vera gel or an antibiotic ointment longer.
2. Makeup may be used after the treatment, unless there is epidermal blistering. It is recommended to use new makeup to reduce the possibility of infection. Just make sure that you have moisturizer on under your makeup. In fact, moisturizer will help the dead hair exfoliate from the follicle, so use moisturizer frequently and freely on the treated area. Any moisturizer without alpha-hydroxy acids will work.
3. Avoid sun exposure to reduce the chance of dark or light spots for 2 months. Use sunscreen SPF 25 or higher at all times throughout the treatment and for 1-2 months following.
4. Avoid picking or scratching the treated skin. **DO NOT USE** any other hair removal methods or products on the treated area during the course of your laser treatments, as it will prevent you from achieving your best results.
5. You may shower after the treatments, and use soap, deodorant, etc. The treated area may be washed gently with a mild soap. Skin should be patted dry and **NOT** rubbed. You may apply deodorant after 24 hours.
6. Anywhere from 5-30 days after the treatment, shedding of the hair may occur and this may appear as new hair growth. This is not new hair growth, but dead hair pushing its way out of the follicle. You can help the hair exfoliate by washing or wiping with a washcloth.
7. Hair re-growth occurs at different rates on different areas of the body. New hair growth will not occur for at least three weeks after treatment.
8. Call your physician's office with any questions or concerns you may have after the treatment
